Čakovec, 4th December 2009

To Whom It May Concern:

The Regional Development Agency Međimurje – REDEA Ltd. was established by the Međimurje County in Croatia, in order to support the process of sustainable development of the region. REDEA's activities encompass planning the development of Međimurje and preparing and implementing projects in line with the County's strategy. It is our objective to bring Međimurje closer towards being a county of strong entrepreneurship based on knowledge and innovation.

Installing a LOFAR station in Međimurje, in collaboration with the CRO-LOFAR science team, is in line with REDEA's strategic development plans. It directly addresses our objective of attracting high-level scientists and researchers in Međimurje. REDEA, as an intermediary between the public and the private sector, will provide support for the CRO-LOFAR science team in finding and obtaining suitable land for the Croatian LOFAR station, as well as the infrastructure necessary for the CRO-LOFAR project.

Please do not hesitate to contact me if you have any further questions.

Yours faithfully,

Matija Derk
Director
